

SIX ARE DEAD, MANY MISSING IN HOLOCAUST

TO RESUME HEARING ON DRY LEAGUE

(EXCLUSIVE DISPATCH.) NEW YORK, April 15.—The investigation by the District Attorney's office into the conduct of the New York Anti-Saloon League, by William A. Anderson, Superintendent, will be resumed tomorrow after a letup of a week. Chief Asst. Dist. Atty. Gen. E. J. Connelley today directed the office to call before the grand jury three persons: O. Burtell Rife, whose charges that Anderson had been in the office of the league; the work of the league; William A. Anderson, chief bookkeeper of the league; and Mrs. Rife, the stenographer in the District Attorney's office, who made a transcript of the informal interview and whose inability to testify on account of illness in her husband's case had caused the postponement of the hearing on March 1.

At Anderson's request, Rife was called to the grand jury from Texas on March 15 and several conferences with the prosecutor, following which she announced she was prepared to proceed with the inquiry, but specified no date therefor.

Ads That Walk and Talk

WHEN one of your young friends comes into the club wearing a suit whose general smartness arouses your admiration, you can't help but wonder where he got it.

AND if he tells you—as he's very apt to—“Why, this is one of Harris & Frank's special suits—some suit for thirty-five dollars, isn't it?” Then you're satisfied that thirty-five dollars will buy a whole lot at Harris & Frank's.

WE HAVE literally hundreds of such tangible ads here in Los Angeles. When young men come to us and tell us that we have exactly what they want they become our strongest publicity—ads that walk and talk.

WE SPECIALIZE in Suits at

LEVIATHAN EQUIPPED WITH A SWIM POOL

(EXCLUSIVE DISPATCH.) NEW YORK, April 15.—Among the equipment of the Leviathan, the finest of American liners is the Pompadour swimming pool having an area of 1100 feet and varying in depth from 1-4 feet to about 6 feet. The pool can be supplied with 150 tons of water in twenty-four hours. Turkish and electric baths can be had aboard ship.

BROWN & WHITE CABS

Drivers are Salesmen of Transportation

The right kind of man power makes the efficient, successful cab driver. Cabs alone, unsupported by experienced and organized, are so much useless steel and iron.

Brown and White Cab drivers are courteous, alert salesmen of transportation. They eagerly strive to give you the best service.

Brown and White Cab is more than the best cab unit built. At the wheel of every machine is a thorough, trained, responsible individual with whom you can trust your life and property.

When Brown and White Cab solved the human equation the problem of public motor transportation was reduced to its simplest terms.

The business man who prospers and survives must serve the public intelligently. Our drivers know this. You—the cab rider—are the real boss. Every man in this organization is your servant.

For every social and business occasion call a Brown and White Cab and you can feel absolutely certain of efficient, considerate service from the salesmen of the wheel.

DIVERGENT VIEWS CAUSE CRONKHITE CASE TANGLE

Rosenbluth's Freedom Traceable to Question of Government Title to Camp Lewis

BY DONALD EWING
Chapter VIII

Capt. Robert Rosenbluth, indicted for willful and premeditated murder of Maj. Alexander Cronkhite at Camp Lewis, Wash., is free today and Roland Pothier, similarly indicted, is in jail in Rhode Island, because court officials in New York and in Howard Island have taken opposite views of the case.

Rosenbluth, when he was arrested last October after Federal indictment in Seattle, raised the point that Camp Lewis did not belong exclusively to the government at the time of the shooting and that consequently the government had no jurisdiction in the case—that it was a case only for Pierce county, Washington, to handle.

A hearing on the point was arranged before State Commissioner Hitchcock of New York. W. E. Joyce, Assistant United States Attorney, was carefully coached on the legal point by the Department of Justice and by Thomas P. Reville, United States Attorney at Seattle, whose brief held that the government had jurisdiction.

POINTS OF HEARING

Reville's chief points were:

1. That, while a sovereign power could specify that its citizens must give deeds in completing transaction of land, there was no power that could say that a sovereign power must or must not give a deed.
2. That the Washington Legislature in an act had authorized Pierce county to give, through condemnation proceedings, the Camp Lewis site to the government and had specified that after all property owned by the government exclusively to the government a deed should be given simply as evidence of the transfer.
3. That, since the deed was merely to be evidence, the land actually became the property of the government as soon as it was turned over to it.
4. That a State Supreme Court decision confirmed this.
5. That the scene of the shooting had been condemned, turned over to the government, and consequently was in its exclusive jurisdiction at the time of the shooting.

DEED NOT MADE

The defense contention was that the land was not the government's until the deed itself was made out—which was done after the shooting.

Rosenbluth's friends again raised the cry of racial persecution. So, a few days before the hearing, Joyce was removed and two Jewish attorneys, Solomon and Selig, who knew nothing of the case's history, were brought in to present Reville's brief was not presented. Commissioner Hitchcock ruled that the government did not have jurisdiction, but ended his opinion with:

"I now direct the matter be placed before a district judge and to facilitate prompt judicial determination of the fundamental question of jurisdiction, I am prepared to return to the United States District Court for the Southern District of New York the entire record, including the indictment, the testimony and the exhibits before me."

The case was never taken before a district judge in New York.

APPEAL PENDING

In Pothier's case, Federal Judge Brown at Providence held that Pothier must return to Washington State for trial. He had reached the United States Supreme Court and from there will go to the United States District Court for the Southern District of New York. Pothier was refused bail and is in jail.

Now to finish the developments affecting Gen. Cronkhite. Last January he was found to be fit in the Regular Army examination. January 15 Gen. Pershing wrote him asking him to retire to make room for younger officers. He refused and wrote to President Harding. February 1 he was retired by the President's order. He had reached the retirement age. His friends said he was railroaded out of the army because he had uncovered asserted carelessness in the War Department's handling of his case. Several conferences had been held concerning him; it is known. The

ONLY SIXTEENTH OF ALASKA IS SURVEYED

MAPPED TRACT INCLUDES AGRICULTURAL AREA AND MINES

(EXCLUSIVE DISPATCH.) WASHINGTON, April 15.—Of the vast expanse of land making up the territory of Alaska, and amounting to 378,165,760 acres, only 1,600,000 acres actually have been surveyed by the Department of the Interior according to estimates made by the General Land Office.

There have, however, been set aside as national forests 30,704,000 acres of timber lands. This leaves 355,861,760 acres in Alaska not surveyed under the rectangular system authorized by Congress and followed by the General Land Office.

The land so far surveyed is confined to known agricultural areas, coal fields, and such adjoining areas as might under normal conditions be attractive to settlers. These tracts are composed of sections of land in the vicinity of Seward just north of Resurrection Bay and extending to the Matanaka coal fields; areas around Fairbanks, including the Nenana coal fields; and the Copper River Valley as far north as the Tanana River and south to the Berina River coal fields and the Gulf of Alaska.

Outside of these districts other widely scattered tracts have been surveyed in regions of Alaska consisting of townsites, trade and manufacturing sites, native allotments and homestead entry claims, but it is estimated that since the territory was purchased from Russia in 1867 for \$7,200,000, only one-sixteenth of its land has been surveyed by the United States government.

KANSAS CITIZEN DIES

(EXCLUSIVE DISPATCH.) KANSAS CITY, April 15.—Robert H. Waggoner, for many years a prominent publisher of a Cincinnati publishing house, died at Rochester, Minn., where he had been undergoing surgical treatment.

Gunshots! Priest-Slayer Chats in Cell, Enjoys Cards

(EXCLUSIVE DISPATCH.) KALAMAZOO (Mich.) April 15.—Father Charles Dillon, confessed slayer of Father Henry O'Neill of St. Augustine Parish, will be arraigned in Circuit Court before Judge V. Welmer Monday. Father Dillon shot Father O'Neill to death in a quarrel at the supper table of the rectory Thursday night.

Father Dillon exhibits no remorse over his crime. Displaying the same calm that characterized his attitude immediately after the shooting and while he was giving his confession to the prosecutor, Father Dillon sits in his cell block and chats with prisoners at the County Jail on a variety of subjects. He even plays card games with some of the prisoners.

MAYOR WARNS KLAN

(EXCLUSIVE DISPATCH.) AUSTIN (Texas) April 15.—Activities on the part of hood-gangs operating as the Ku Klux Klan will meet with drastic action on the part of the police, Mayor George H. Irish of this city announced. The announcement came after the appearance of the burning cross in Horace Austin State Park, which is presumed to have been an indication of the starting of Klan activity here.

GIRL SLAYS MAN OVER OLD WRONG

Attacked Three Years Ago When 12 Years of Age, She Waits With Gun by Side

(EXCLUSIVE DISPATCH.) CHICAGO, April 15.—Frank Tomanto, 48 years of age, three years ago debauched Anna Diodana, 12, and then fled to Philadelphia. Early this morning he returned and when he sought to enter the Diodana home, the girl who had been brooding over the wrong done her for three years, shot him once as he was trying to force the door, and twice more as he staggered down to the front gate.

When the police arrived they found the girl, dry-eyed and calm, sitting at the table. When they entered she pushed the partly emptied pistol across the table to them and told her story.

"He ruined my life three years ago," she said. "I was 12 years old and he was 35. He was a man who had just died and he was a man who had just died and he was a man who had just died."

My mother had just died and he was a man who had just died and he was a man who had just died."

My mother had just died and he was a man who had just died and he was a man who had just died."

My mother had just died and he was a man who had just died and he was a man who had just died."

CHICAGO MOOCHERS LIVE ON EASY STREET

REGULAR ESTABLISHMENTS SELL EQUIPMENT TO CITY BEGGARS

(EXCLUSIVE DISPATCH.) CHICAGO, April 15.—"Mochoers" and "panhandlers," who prey upon the city's beggars, are beginning to work on a new plan. They are selling to the city beggars more than \$1,000,000 annually from soft-hearted citizens of Chicago, who by the misguided "charity" encourage laziness and create a shortage in the labor market.

Many of these moochers, who have an appearance of abject humility in the day time, do not hesitate to swing a mean blackball as soon as darkness falls. The business of begging is a highly organized industry, not developed to the degree that prevails in New York, Rome, London and other cities, but it is a paying industry. Regular establishments provide the equipment for beggars. These include colored rubber "blisters" that are held on the hand or arm by elastic bands and are carefully unwrapped to excite the pity of the passerby. They are held on the fingers, bandaged colored with aniline dye, that are slipped over real ending of the case can come through a trial. Rosenbluth refuses to stand trial.

PLAN CO-OPERATION FOR RECLAMATION

COMMISSIONER APPOINTED TO CARRY OUT WORK IN HARMONY

(EXCLUSIVE DISPATCH.) WASHINGTON, April 15.—In furtherance of his policy for the improvement of government reclamation projects along business and agricultural lines paying more attention in future to aiding and co-operating with farmers on the projects in matter of successful agriculture, Secretary Work has appointed Miles Cannon, former Commissioner of Agriculture of the State of Idaho, to the post of field reclamation commissioner, Department of the Interior.

The work to be carried out by the new commissioner of reclamation is not to conflict with or duplicate work already being carried on by the engineering branches of the reclamation service, nor the work of the Department of Agriculture, but is rather to be in co-operation with existing State and Federal agencies and furtherance of these lines of work in the interest of settlers occupying lands under the reclamation projects. The work is also to be in co-operation with the various States in which reclamation projects are situated.

Special consideration of the various problems arising on or affecting the projects by an experienced man in actual touch with conditions upon the working in harmony with existing State and governmental organizations will, it is believed, mark the beginning of co-operation with the Agriculture Department and thereby eliminate possible duplication and enable the farmers not only to raise better and more diversified crops, but to apply modern methods to handling, marketing and realizing on crops produced while at the same time effecting economies in the cost of reclamation and cultivation.

ELECTION CALL REFUSED

(EXCLUSIVE DISPATCH.) OSHKOSH (Wis.) April 15.—There will be no special election here on the question of abandoning the commission form of government, Mayor A. C. McHenry announced. He refused to call a special election declaring that the petition recently filed did not bear the required number of signatures, following an opinion by the corporation counsel.

IOWA BANK IN TROUBLE

(EXCLUSIVE DISPATCH.) DENVER (Colo.) April 15.—The private bank conducted here by C. W. Payne for forty years has passed into the hands of a receiver. E. B. Spottswood, the cashier, has been appointed receiver. Payne has been a resident of Sioux City for a number of years, the bank being conducted by his son and Spottswood.

CASE THROWN OUT

(EXCLUSIVE DISPATCH.) OMAHA April 15.—District Judge Fitzgerald of Omaha freed Fred H. Claridge on trial at Blair charged with aiding and abetting the condition of the defendant banking house of A. Cas-tetter, of which he had been president since 1912. The court held the information was defective. It is doubtful whether the State will go to trial on two other charges against Claridge.

HYGIENE and PLUMBING

AT no time in the world's history, have we given so much thought to HYGIENE. This fact is reflected in everything about us. The food we eat; the clothes we wear; the games we play; the houses we live in; in fact in everything in life today.

Man takes better care of himself than he did in the past. He watches his diet; takes care of his body; preserves his energy. He keeps fit. He golfs, he exercises, he motors in the fresh air. He lives more in the outdoors. He thinks of his health.

In all these things, nothing plays so important a part as *Modern High-Class Plumbing.*

To be healthy, happy and successful think first of the PLUMBING in your home. Select it YOURSELF. Buy it direct. Do business only with a member of the Sanitary Development League. It is composed of over 200 modern successful plumbers in Southern California. They know their business and will treat you fairly. The League is behind them and their work.

LANSING-ISHII PACT IS ENDED

Hughes and Hanihara Agree on Abrogation

But Two Major Issues Left Between Nations

Radio Concession in China is New Question

(EXCLUSIVE DISPATCH.) WASHINGTON, April 15.—Cancellation of the Lansing-Ishii agreement of Nov. 2, 1917, which it was announced some time ago had been agreed upon by the two nations, became an accomplished fact on Saturday. Letters were exchanged on that day between Charles E. Hughes, Secretary of State, and Masamichi Hanihara, Japanese Ambassador, abrogating the war-time conference dealing with the "open door" clause of the nine-power treaty.

"The discussion between the two governments," said Mr. Hughes, in his letter, "have disclosed an identity of view and, in the light of understanding arrived at by the Washington Conference on the Limitation of Armaments, the American and Japanese governments are agreed to consider the Lansing-Ishii correspondence of Nov. 2, 1917, as canceled and of no further force or effect."

The reply of the Japanese Ambassador embodied exactly the same language as that of Mr. Hughes and in addition said: "I have the honor to acknowledge the receipt of your note of today's date, communicating to me your understanding of the status of the Lansing-Ishii exchange of notes of Nov. 2, 1917. I am happy to be able to confirm to you under instructions from my government, your understanding of the views thus developed."

Disposal of this question leaves only two of serious character at issue between the two nations. One is the matter of our immigration laws and anti-Japanese legislation in the West, which remains just where it was when Roland C. Morris and Baron Shidehara dropped efforts to reach a settlement just before the Harding administration came into power. The other is the difference which has arisen over the acquisition by the Mitsui Company of what this government considers monopolistic wireless concessions in China and in which the United States is supporting the rights of the Federal Wireless Company to do business on equal terms with the Japanese company.

REVENUE JUMP SHOWN BY CENTRAL RAILROAD

INCREASE OF \$12,732,321 IN OPERATING RETURNS FOR 1922 REPORTED

(BY A. P. NIGHT WIRE.) CHICAGO, April 15.—An increase of \$12,732,321 in operating revenues for the year ending Dec. 31, 1922, was announced in the seventy-third annual report of the Illinois Central Railroad Company made public tonight.

There also was an increase of \$12,732,321 in freight revenue ascribed to the railroad's business handled. The increase in traffic, according to the report, was offset to a considerable extent by a 10 per cent reduction in rates ordered by the Interstate Commerce Commission.

On the other hand, passenger revenue for the year decreased \$476,109 as compared with the previous year. A decline in the volume of through passenger traffic, but an increase in the Chicago suburban traffic was noted. Operating expenses increased \$2,276,926.

In his report to the board of directors, C. H. Markham, president, declared that the report showed "a general revival in business during the latter part of the year."

"The labor unrest, culminating in the strike of railroad shopmen, were disturbing factors that retarded growth of business," he added.

A decrease of \$1,899,470, or 8.47 per cent, in maintenance of way and structures' expense was ascribed to decreased wages, reductions in costs of materials and supplies, and a decrease in the renewal of bridge and switch ties due to inability to obtain full requirements.

An increase of \$1,644,699 in maintenance of equipment expenses was declared due to increased depreciation charges by reason of additional equipment acquired, an increase in charges for equipment retired and additional expenses incurred by reason of labor troubles.

FARM POPULATION OF NATION REDUCED

MOVEMENT TOWARD CITIES IS STRONGEST IN STATES OF WEST COAST

(EXCLUSIVE DISPATCH.) WASHINGTON, April 15.—The agricultural population of the United States decreased approximately 460,000 persons in 1922, as shown by a survey of 10,000 representative farms and groups of farms made by the United States department of agriculture. This is a drop of about 1.5 per cent based on 1920 census figures which placed the agricultural population in rural districts at \$1,359,000 persons. Not merely workers, but men, women and children are included in the estimate.

Among the geographic divisions, the population movement away from the farm was relatively strongest in the Pacific States, and the percentage of loss was greater than the average for the United States in the West, South Central and New England states as well as in the Pacific group. All other divisions were below the national average.

New Companion for Eccentric Philanthropist

(EXCLUSIVE DISPATCH.) NORTH CARVER (Mass.) April 15.—Charles A. Garland, eccentric young son of millionaire stock, who gave \$800,000 of his million dollar inheritance to the American Fund for Public Service, has a new "soul twin" at his farm here, where Joe April and his wife used to live with so many children that some of them had to sleep in hen coops. Young Garland has neither wife nor children with him now, but he has a new "mental complement."

A bobbed-hair brunette, be-goggled and wearing knickers, has replaced Doris Benson as companion of the young millionaire philosopher, idolist and dreamer. The new acquisition of Garland's fancy is living in a dilapidated shack and is helping him with the spring planting. No one seems to know who the young woman is. Doris Benson, it is said, has gone to New York.

During a talk with Garland the newest female addition to his farm was digging holes with a tablespoon to transplant lettuce. At one time as the reporter was about to leave, she cried: "Look out, you're standing on the peas," and when he stepped back she roared: "Agh now you're on the rhubarb."

Millerand to Open Exhibits of War Relics

(BY CABLE-EXCLUSIVE DISPATCH.) PARIS, April 15.—President Millerand will open formally in Invalides Museum tomorrow new rooms devoted to exhibits of the Allied armies. Assisting in the ceremony will be French Foreign Minister, M. Herriot, Foreign Minister, M. Maginot, Minister of War, M. Hauber, Foreign Minister.

The United States exhibit is perhaps the most complete in the group. It was assembled after two years' effort by Col. T. Bentley, military attaché of the American Embassy, assisted by Maj. T. N. Gimpelring. Conspicuous in the exhibit is an oil portrait of Gen. Pershing, painted by Mme. Heaco and presented by the Knights of Columbus.

DEATHS BY AUTO ARE INCREASING

RISE OF 13 PER CENT SHOWN IN FATALITIES OVER YEAR OF 1921

(EXCLUSIVE DISPATCH.) NEW YORK, April 15.—Automobile accidents killed 14,000 persons in the United States in 1922, an increase of 1000, or 13 per cent, over 1921, according to figures issued yesterday by the National Bureau of Casualty and Surety Underwriters.

The figures represent an estimate made by the automobile department of the bureau based on fatality statistics furnished by health officers in the sixty cities and counties ranging in size from 25,000 and including New York. Application of the figures gives a country-wide automobile death rate of 12.9 per 1,000,000 of population, as against 11.5 for the preceding year.

A chart made by the bureau indicates that in spite of the constant yearly increase in the death rate based on population, the rate based on the number of automobiles registered here has decreased considerably. Thus, while the number of automobiles has increased five-fold since 1915, the total automobile fatalities has little more than doubled.

According to the health officers' reports, automobiles were responsible for 67 per cent of all vehicular fatalities in the sixty cities in 1922, more than four times the number caused by railroad trains and seven times those due to street railways.

GREAT NORTHERN TO EXPAND TERMINALS

(EXCLUSIVE DISPATCH.) ST. PAUL, April 15.—Plans for the expansion of the St. Cloud, Minn., terminals of the Great Northern Railway at a cost of approximately \$500,000 are being developed here by executives. It was disclosed today. The improvement will make St. Cloud one of the most important terminals on the Hill system. Contracts for the major portion of the construction work are expected to be awarded within a few days.

AUTHENTIC WORK OF HOLBEIN DISCOVERED

(BY CABLE-EXCLUSIVE DISPATCH.) BASEL, April 15.—An authentic work of Holbein has been discovered by the director of the Basel Museum in the old residence of the King of Wurttemberg. The subject of the canvas is the "Judgment of Solomon." Experts believe it was painted after Holbein's visit to Italy and about the same time he made the frescoes in the Town Hall of Basel.

MANY SHIPS IN CRASHES DUE TO TIDE
Tanker Forced Aground; Craft Have Difficulty in Passing

Repetition of the freakish tides of Saturday which created havoc among the in and outboard shipping at Los Angeles Harbor yesterday, resulted in the grounding of several vessels, as well as minor collisions and mishaps. The recurring tide yesterday ebbed and flowed fourteen times, reaching the unusual height of seven feet three inches at the flood.

Outbound loaded for New York, the giant Shipping Board tanker Halway was forced out of her course down the main channel by the swirling currents and ran aground opposite the Fifth street Navy landing. She was floated an hour later and proceeded to sea after narrowly averting collisions with two inbound lumber steamers. The automobile ferry on the run between the mainland and Terminal Island also experienced extreme difficulty in maneuvering across channel and crashed into the First street mole while attempting a landing. The operator of the ferry was forced to back the craft up to the ram to make a landing. The unusually high tide sent hundreds of tons of rubbish adrift from where it had collected under the wharves and numerous collisions with half-sunken piling and timbers floating in the stream were experienced by small power craft during the day. Difficulty in passing the dreadnoughts of the battle fleet, anchored in the roadstead, was also encountered by merchant vessels, the eddying tidal currents swinging the huge fighting craft at their anchor in unexpected directions. Mariners at the port declare the phenomenon directly attributable to a submarine seismic disturbance pointing out that the same conditions prevailed at the port during the height of the tidal waves on the Chilean Coast and at Hawaii.

Fire-Damaged Freighter to be Repaired Here

Six hundred tons of burned cotton and general merchandise were taken from the charred No. 5 hold of the Japanese steamer Fuji Maru at the harbor yesterday. The freighter, a unit of the "K" line fleet, arrived here Saturday after successfully combatting a six-day fire at sea, but the hatches of the burned hold were not unsealed until marine surveyors and representatives of her owners arrived from San Francisco.

The Fuji Maru from Calcutta for Kobe with cotton and general cargo, was on route to Los Angeles Harbor for bunkers when the fire broke out. It is believed to have been started from spontaneous combustion of the cotton cargo, according to marine surveyors. After a conference here yesterday between Capt. Thomas Smith, Lloyd's surveyor, and K. Uchida, vice-president of the Yamashita Steam Navigation Co., it was decided to repair the disabled craft at this port before she proceeds to the Orient.

Steamer Loads Benzine Cargo for Liverpool

The most highly inflammable cargo ever leaving Los Angeles Harbor was to go out to Liverpool at daylight today on the British tank steamer Lumina. It is 45,000 barrels of extra high-test benzine, the loading of which has required three days of slow pumping at the Mormon Island terminal of the General Petroleum Corporation.

That the danger of combustion or explosion might be reduced to a minimum on the Lumina during the thirty-five-day run across the Atlantic, the giant tanker was converted at a cost of nearly \$25,000. The call here of the Lumina marks the beginning of a Los Angeles-Liverpool oil run by the tanker fleet of E. E. Mast, owner. Capt. Alexander Gordon, veteran British skipper of the Lumina, is known in ports around the world as the greatest seagoing necromancer and master of legendein.

DAIRYMEN GET CHECKS

Kings County Creameries Pay \$400,000 for Butterfat in March

(EXCLUSIVE DISPATCH.)

HANFORD, April 15.—Approximately \$400,000 was paid out by the seven creameries of Kings county yesterday in settlement for March deliveries of butterfat, at prices ranging from 48 1/2 to 50 cents per pound. While March this year showed a low price level, it was better than that of a year ago, and the tendency of prices is upward, giving an optimistic feeling to dairymen.

Recent heavy rains have assured good wild feed pastures of all kinds and will materially increase the output of alfalfa. The creameries have no large surplus of butter and improvement in industrial conditions throughout the country means increased capacity to purchase food products among which butter is a staple.

POLITICS

THE WATCHMAN

TREND OF POLITICAL ACTION AND THOUGHT

By The Sentry on His Beat

Drafted for public office, Charles T. Wardlaw of the Van Nuys district finds himself a candidate for the City Council at the May 1 primaries against his own personal preference. As railroad executive, banker and rancher, he has had wide business experience and when his neighbors in the San Fernando Valley, a unit, started the demand that he be a candidate for the City Council so that his training and indurment could be utilized in the business of the city government of Los Angeles, Mr. Wardlaw could not say "no."

Mr. Wardlaw is 51 years of age. He was born in Granville, Ill. He lived a number of years in Nebraska, where he served as County Clerk and Recorder at Chadron.

Charles T. Wardlaw

Later he moved to Salt Lake City, where he went to work for the Union Pacific system, coming to Los Angeles in 1905 where he became assistant to H. V. Platt, general manager of the southern division. Firing of railroad, Mr. Wardlaw resigned, went to Mexico where he was a rancher, and then returned to Los Angeles and became president of the First National Bank at Van Nuys, which he absorbed three years ago by the California Bank. He is now devoting his attention to his fifty-acre fruit and bean ranch in the San Fernando Valley.

WAR DECLARED ON MEXICAN DOPE KING

(EXCLUSIVE DISPATCH.)

CALIXICO, April 15.—Indicating their desire to co-operate with American officials in stamping out the dope-smuggling trade, Mexican officers arrested Justa Avila in a Mexicali hotel and confiscated \$4000 worth of opium. Bond was refused Avila until next week. The inspector of police in the northern district of Lower California, declared in connection with Avila's arrest that he would see that no leniency would be granted violators of the narcotic laws in the district.

RIVERSIDE CHAMBER TO MEET AT PALM CANYON

(EXCLUSIVE DISPATCH.)

RIVERSIDE, April 15.—Palm Canyon, Riverside county's proposed national monument, about six miles beyond Palm Springs will be the scene of the next meeting of the Riverside County Chamber of Commerce on Tuesday.

The meeting will open at 12:30 p.m., with a picnic luncheon. The Chamber will provide coffee, cream, sugar and sandwiches and each member is asked to provide eating equipment such as spoons and cups. The road is said to be in good condition all the way and it is expected that a record crowd will attend.

JOYRIDERS TAKE AUTO

(LOCAL CORRESPONDENT.)

HUNTINGTON PARK, April 15.—While Walter Polack attended the Huntington Theater, last night, some joyriders stole his car. A search failed to reveal the missing automobile. This morning a telephone call at first headquarters brought the information that the machine was located a short distance from the Police headquarters. It had been run a distance of forty miles since being left near the theater. The local car chase, however, receiving a number of similar complaints, and had been working on the case for some time. A number of young men had been taking machines, leaving them to be purchased by the city after a few hours' ride.

KERN COUNTY MINES ACTIVE

(EXCLUSIVE DISPATCH.)

BAKERSFIELD, April 15.—H. E. Johnston, N. R. Solomon and E. D. Burge, all mining men of this city, have just returned from an extended trip through the Randburg mining district, with interesting reports of development work now going on in that region. At the Silver Belle the mining men found that at the farthest working, 125-foot crosscut on the 780 level, and at 148 on the fifth level, the advancement work is finished. On the seventh level it was necessary to use much steel in running a crosscut.

In the face of the crosscut on the 8th level a decided change appears to be coming, the face appearing to be entirely mineralized. Crosscutting on the lower levels was begun February 23. The advancement shows 273 feet in thirty-one days.

INTO SILVER MUD

What is believed to be one of the most interesting of the new strikes in the district is just below the 100-foot line in the White Horse Rand. The crosscut is said to have gouged into the famous silver mud of the Rand.

Crosscutting continues on the first level of the Ben Hur Extension, with hope of cutting the Gold Coin ledge. A number of stringers have been cut, according to reports. The Pasadena lease on the Nondescending claim is crosscutting at a depth of 175 feet with the same hope, the mining men found.

The Treasure Hill is down below the 200-foot mark. In the Ben Hur the company is crosscutting on the fourth level, and drifting on the third. The Belcher Extension, nearing the 400-foot level, will cut into a concrete to connect with the Farfars and Rutledge lease. This latter lease is now drifting under the so-called dille on the Reserve claim.

The Devis is reported to be making good headway with the sinking of its shaft, now down 140 feet. All of the machinery is on the ground, concrete foundations have been laid, and the shaft is being hoisted and other preparations are complete. The Big Gold has received a hoist and is expected to drop its shaft speedily.

Just two years ago other than the trucks that were hauling away ore for the Big Silver and the Grady lease, one three-ton truck could have handled all the extra work in the entire field. Today in every part of the field there are five and six-ton trucks moving as if the drivers were on a bonus basis. Machinery from Bakersfield and Los Angeles, lumber from Los Angeles Harbor and commodities from the leading cities of the State all provide topping loads for men who following trucking.

As Old As The Pharaohs

His Highness Ras Tafari, Prince of Ethiopia, who has introduced European customs into his kingdom, and has recently given his patronage to a French and American expedition to the lands beyond Nile, is a royal prince of a line as old as the Pharaohs of Egypt.

OIL PRICE CUT IS NOT SERIOUS

Huntington Beach Expects Little Effect

Average Hole Production Shows Decline

Four New Wells Add to Field Total

(REUTERS DISPATCH)
HUNTINGTON BEACH, April 15.—The cut in oil prices of crude has affected this field to some extent but it has not developed to a point where one could predict a reduction in activities. There are four new wells on production and three new rigs in the field making a total of 12 rigs. There was a loss in production of 13,647 barrels during the week caused by a large number of wells being pinched in on account of notice from pipeline owners that only a limited amount of oil would be received.

The field produced 127,737 barrels a day during the week, which was valued at \$99,418 according to the new schedule put into effect last Tuesday. The average per well has also fallen twenty-four barrels daily, from 194 to 170 barrels.

There are four new wells on production, adding a total of 9,600 barrels a day.

The big well of the week is Encyclopaedia No. 2 which is flowing 4,000 barrels of 24 gravity oil. It is 5,052 feet deep and the oil string contains 102 feet of screen casing.

It is the deepest producing well in the world at the present time, being slightly deeper than the Encyclopaedia No. 3. The gas pressure is 250 pounds at the casing head. The well is a redrill of an old well.

Another deepest well, Selby & Root have completed their Curtis No. 1, which is flowing 1,000 barrels of 21 gravity oil. It is 5,110 feet deep and contains 110 feet of screen casing.

It is the deepest producing well in the world at the present time, being slightly deeper than the Encyclopaedia No. 3. The gas pressure is 250 pounds at the casing head. The well is a redrill of an old well.

HILL WELL SURPRISES OPERATORS

Large Producer Comes in Area of Low Ratios at Beach Field

By a "Times" Staff Correspondent
LONG BEACH, April 15.—Ramsey Brothers City B-1 well on Ramsey Island, situated in the Signal Hill field, has surprised operators by coming in as a 250-barrel producer in an area of low ratios.

With the nearest producing well having a daily flow of less than 100 barrels and adjacent wells ranging from 450 to 1,200 barrels a day, the Hill well is regarded as one of the biggest surprises in the local field. The oil is 16 gravity.

The well was spudded in on November 4, 1923, and drilled by Tucker & Johnson to a depth of 4,178 feet, a total of forty feet of oil sand being opened at that point. The hole was bridged back to 4,126-foot level, where the water string was cemented. After a three-day test, the well showed a complete water shut-off.

Later the hole was carried down to a depth of 4,332 feet, with 203 feet of oil sand showing. Then the drill pipe froze in the well. Several days of hard work ensued, during which all but 450 feet of the pipe was recovered. Recently, being struck by a blowout, the well was abandoned.

A flow started soon thereafter, bringing the total of oil being produced in the Ramsey Brothers field to 1,200 barrels a day.

Officials of the Ramsey Brothers declare that the well will probably flow at twice its present rate if the 450 feet of drill pipe can be recovered. The well is the first big producer in the field.

Several days of hard work ensued, during which all but 450 feet of the pipe was recovered. Recently, being struck by a blowout, the well was abandoned.

A flow started soon thereafter, bringing the total of oil being produced in the Ramsey Brothers field to 1,200 barrels a day.

REVIEW OF OIL ACTIVITY TORRANCE TERRITORY SPREADING

Community Well No. 3 Showing Up With Large Daily Flow

(REUTERS DISPATCH)
TORRANCE, April 15.—Indicating that further improvements may be expected as the wells go east in this field, the Standard Oil Company brought in Torrance Community No. 3 on Thursday, now report that it is making between 600 and 1,000 barrels a day, although banded down to three-eighths of an inch. The first cut of the oil showed it to be 24.6 gravity and the well is being produced out of it is expected to test around 27. The well was put on production at 1,600 feet after passing through a little more than 500 feet of oil sand.

Torrance Community No. 3, now the biggest well in the field, is the farthest east of the producing wells and is on the east edge of the thirty-acre Standard lease. On the adjoining lease the Hub Oil Company has a well, and according to reports it is expected to be put on production within the next few days. All reports from this well point to a good producer. In Torrance No. 4, one location to the west on the same lease, the first cement job proved a failure, and the well will be drilled deeper and cemented again.

A bad fishing job in the Peterson-Snyder's well, which was held up the drill for several days recently. The well is now down 5,400 feet and the log, according to officials of the company, compares favorably with the log of some of the big wells in the field in this part of the State. This well is being followed closer than any other in the field, as it will extend the Torrance field approximately two miles if it proves to be a producer.

At Superior, the Magnolia is spending a \$7,000,000 bond issue in the construction of a reverberatory smelting plant, in enlargement of its mill and on a broad-gauge branch railway, already in operation, and used for shipment of ore and concentrates to Hayden.

Millions have been spent around the United Verde reduction and smelter, and the Hayden Copper & Iron Company is bringing in the rate of from five to ten a week, and several other operators are making similar records.

Minute News From Petroleum Fields and Markets of Trade

ADVANCES
Oil activity points to a recovery in the oil market. The price of oil has advanced in the last few days. The price of oil is now \$1.15 per barrel. The price of oil is now \$1.15 per barrel.

LARGE DEMAND ON PRODUCTION
Record breaking is beyond war period mark. Stocks, however, marked by declining price. Home consumption increases one explanation.

FAMILY IS BROKE

The story is about the Ranevsk family, which owns a cherry orchard, which is beautiful but unprofitable, while the members are distressingly broke. There is a progressive gentleman by the name of Lopakhin who wants to save them and turn it into a nice prosperous villa subdivision. And it is the family reaction to this "true

WISDOM TO DUMB FRIENDS OF MAN URGED OVER KHJ

Showing of Lightning Brute's Life
Talk by Los Angeles Pastor

Planning for the manifestation of kindness to human-
ity was made to the KHJ audience from The
Broadcasting Station, yesterday, by Rev. Edgar Fay
pastor of the First Christian Church and member
of the board of the S.P.C.A.

Men of the horn,
and the cow, as well as
the wild animals which
live from time immemorial
in the wilderness.

Mr. Daugherty spoke
of the "Humane Sunday" in
the world's kind-
ness. From off the
pages and from out the
lips of the speaker, the
audience was gripped by
the thought of kindness
to the dumb creatures as a
virtue.

It has been possible to
prompt the sentiment
of kindness to the dumb
creatures, but the speaker
who would have him
to be a work, and the
audience to "wait the
moment" for kindness to
the dumb creatures is the
most common of the con-
siderations.

Humane Sunday has annual
as an effort of the hu-
manity to the dumb crea-
tures. It is a protest against
any creature
of the dumb creatures, but
it is a protest against the
dumb creatures in the con-
sideration.

Humane Sunday has annual

ure in the world beyond, is richer
than an ungodly king who sits
upon his throne in splendor.
No amusement, pleasure or
financial gain will satisfy the
hunger that gnaws at human hearts,
the longing that only God can
satisfy.

"The rain falls alike on the just
and the unjust, but the time will
come when it will increase to a
downpouring storm. Unto the man
whose house is built upon the sand
the rain brings terror and de-
struction; but the man whose
house stands on the rock, it brings
floods of blessing. Like Nebuchad-
nezzar, everyone must observe the
handwriting on the wall, and be
prepared to be wiped in the bal-
ance. Your generous, unselfish
deeds, your kindnesses to God's
other children, are the heavenly
treasures that no flood can wash
away."

PASTOR THINKS SMITH
IS MAKING MISTAKE

Rev. Thomas Lutzman, pastor of
the Methodist Episcopal Church,
preached yesterday on "Why
Smith Doesn't Go to Church." He
said in part:

"It is a mistake to suppose that
Smith is a hypocrite because so
many church members are hypo-
crites. The best thing he can do is
to join and thus increase the num-
ber of those who are not hypo-
crites. No man has the right to
judge Christianity by the conduct
of those who are not hypocrites.
Reference to Paul, Smith doesn't
go to church because there are so
many hypocrites in religion. But
there are hypocrites everywhere
else. You can't escape mystery.
Life is a mystery. It is a mystery
because he doesn't believe in
miracles and the church teaches
the miraculous. It's a strange twist
in human nature that man ceased
to believe in miracles when he
himself began to achieve the
miraculous. Jesus Christ died be-
cause he had stretched fancy to
its uttermost. We are practicing
what he dared not prophesy. American
days are more marvelous than Arabian
nights. Superlatives are thread-
bare. Language is bankrupt to de-
scribe the admitted facts of today.
We cannot measure the arm of the
Almighty with a human yardstick."

BELIEVERS ARE URGED
TO PROVE THEIR FAITH

A profession of faith is not suf-
ficient to save a man, according to
the opinion expressed yesterday by
Rev. Alden Lee Hill in his sermon
at the Highland Park Christian
Church. The Rev. Mr. Hill spoke
in part as follows:

"Because the scriptures affirm
that 'whoever believes in Him
shall not perish, but have eternal
life,' the Christian should be over-
whelmed with the thought that
everyone that calls upon the name
of the Lord shall enter into the kingdom
of heaven; but he that doeth the
will of my Father which is in
Heaven. A mere calling and be-
lieving will not suffice. We are
warned not to be hearers only, but
doers of the word. Faith without
works is dead. Some folks are
good, but so far as the kingdom of
heaven is concerned they are good for
nothing."

PASTOR DESCRIBES
IDEAL HOME LIFE

Rev. Clinton J. Taft, pastor of
the Plymouth Congregational
Church, preached yesterday on
"Our Homes." He spoke in part
as follows:

"A home is hardly worthy of that
exalted name unless the laughter
of children is heard within its
walls. No account of fine furniture
or exquisite fittings can take the
place of children. The children
home cannot possibly be the ideal
home. America is going to com-
mit race-suicide as France is do-
ing? What means this lowering
birth rate? Are college graduates
going to allow the race to be re-
plenished from the ranks of the
uneducated altogether? It is im-
possible to have children of your
own, then adopt some. Many lit-
tle fatherless and motherless dears
are waiting your beck and call
in our orphanages. Why not get
them away from the institutional
type of life and give them a real
home? At the same time you will
be doing yourself an incalculable
favor."

RELIGION IS JUDGED
BY EFFECT IT HAS

Dr. W. E. McCulloch, pastor of
the First United Presbyterian
Church, preached yesterday on
"Who is Jesus of Nazareth." He
said in part:

"The question concerning per-
sonality is always interesting. It
is supremely fascinating when re-
lated to Jesus Christ. 'Who do
men say that I am?' asked the
Master of his immediate disciples,
and the inquiry has enlisted the
study of all succeeding genera-
tions. It is neither unreasonable
nor incredible that God should
express Himself through man. If
God wills to reveal Himself to the
hungering, aspiring race of man-
kind, what method could be so ef-
fective as incarnation? The re-
sult is that He is the divine Saviour
of the world. The practical test
works; it produces results that may
well be described as miraculous.
Christ's power to redeem, to
transform the hearts and lives of
sinners has been demonstrated
and growth in spirituality are
matters of everyday human ex-
perience. They are as evident as
any other facts of human life. The man
who surrenders himself to Christ
and who follows Him sincerely is
not in need of philosophical and
theological proofs of the truth of
religion."

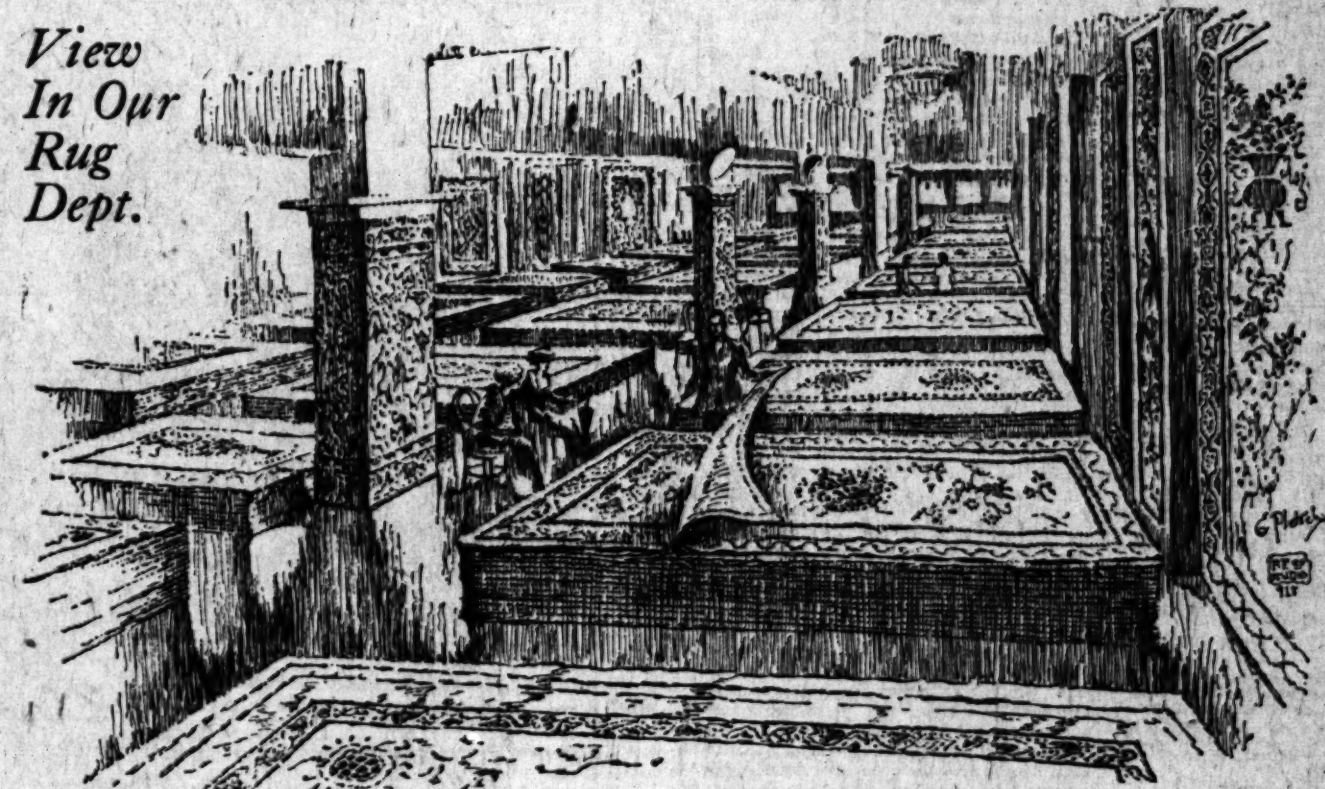

SAYS HUMANS ARE
KIN TO FLOWERS

Rabbi Edgar F. Magnin, preached
at Temple Beth El last Friday
on "Human People." He spoke in
part as follows:

"What the world needs is human
people, people who are big, people
who are broad, people whose faces

Rug
Dept.

Think What It Means To Choose From This Great Rug Assortment

There is almost every size and color combination you could think of—there are price levels ranging from domestic rugs for a few dollars up to Oriental and Chinese masterpieces at several hundred—yet the cheapest rug you select can be relied upon to give satisfaction and full value for the money invested.

All of this is possible, because of our large volume of business in a location that enables us to sell for less.

Our values and service attract people in large numbers from all over Southern California.

Over 100 Wilton Rugs of Excellent Quality in the 9x12 Size SPECIAL AT \$95.00

This lot includes genuine Wilton rugs of the best second runs to the very finest quality suitable for the living room and dining room. As some in the latter made for bedrooms. Some of these rugs were originally ordered to sell for less than \$100 and most of them are now at a special price of \$95.00.

WIDE LOOM CARPETS
9 ft. Plain Tape, Axminster
Carpet, per square yard... **\$7.50**
Imported Chenille Carpet, 10.6, 12 and 15 ft. widths, per sq. yard... **\$11.50**

Special Lot Of Rugs At ONE-FOURTH OFF

Rich, heavy rugs suitable for fine living room use in Chinese patterns and plain centers with Chinese borders. Made with a fine wool Wilton pile on the sturdy Axminster frame and closely resembling the texture and appearance of the much more expensive Chinese rugs.

Here are the special ONE-FOURTH OFF prices:

9x12-ft. size...	\$63.75
8.3x10.6 size...	\$60.00
6.9x9 ft. size...	\$41.25
4.6x7.6 size...	\$26.25
27x54 size...	\$ 6.75

MAKING the home attractive does not necessarily require a great outlay if you have the help of an efficient home furnisher.

Our sales organization is made up of individuals who have spent a lifetime of study in the art of making homes more attractive and livable.

RARE CAMEO HELD IN BANK

Old Gem, Formerly Owned by Italian Crown Prince to Be Brought to Los Angeles

A cameo of great historic value and exquisite workmanship that has been in the possession of the same family for 176 years, lies in a bank in Los Angeles Harbor and soon will be brought to Los Angeles, perhaps to be exhibited in some museum. It is possessed by H. W. Latimer, a retired orange rancher of Porterville, who lives at the harbor.

His son is W. S. Latimer, supervisor of the commercial department of the Southern California Telephone Company at Los Angeles.

SHELL NOW EXTINGUISHED
The cameo is made of a type of shell now extinct in Italy. The carving is of a woman's head, and under the glass the workmanship is declared to be of the finest of the now extinct art. Its quality is vouched for, for no other reason, than that it was originally the property of the Crown Prince of Italy.

How the cameo by inheritance comes into the hands of an American family is an interesting story, and, incidentally, shows how the most noble blood of Europe is blended in the American stock. The younger Mr. Latimer yesterday told the story as follows:

"In the year 1746 the Crown Prince of Italy visited Australia and met my great, great grandfather, James Ebernesser, who was a noted collector of rare jewels. The Crown Prince also was a collector of jewels. They met and became very friendly. In 1747 my uncle paid the Prince a visit and inspected his jewels. In the collection were some very rare cameos which Ebernesser admired. 'Our intellectual ideals will be satisfied, the longings of our souls for perfection will be gratified, the desires of our hearts will be met, will be fully met and there shall not be a want of man that shall not be supplied.'"

"It will not be a lady man's Heaven, for Heaven shall be a place of increasing and happy service. We shall work and not grow weary. Heaven is a place of restful activity."

15¢ SPECIAL TRIAL TIN

Genuine

Espee Vacation Fares Will be Effective Soon

Vacation fares for mountain and beach resorts will be effective the 27th inst., E. F. McGinnis, general passenger agent of the Southern Pacific Railroad, announced yesterday. Two forms of reduced rate tickets are provided, a three-month ticket with stopover privileges which sells for about one and one-third times the regular one-way rate, and a fifteen-day ticket sold on Fridays and Saturdays at a trifle more than one way fare.

Back-East excursion fares will be inaugurated May 15, with round-trip fare slightly more than one-way fare. They will have stopover privileges, except in California, on the trip out.

Latters incorrectly addressed in the United States cost the government over \$2,000,000 in extra expense each year.

Bertha M. Clay Story on Loew
Screen
By Grace Kingsley
Bertha M. Clay is merely a
sleaze of mind. The state of mind
of the 15-year-old of the late
Victorian era, and of many sce-
nario writers. You realize that
when you see "Thorns and Orange
Blossoms" from the Clay epus,
which is showing down at Loew's
this week. Additional entertain-
ment includes the singing of Dor-
othy Jordan, who is continuing her
engagement.

Indeed, there is plenty of dirty
work at the cross-roads of Seventy
and Broadway this week! Mostly
performed by a Spanish mix, who
does the heroine wrong.
Bertha worked with a regular
set of puppets. There were always
in her (or is it his?) tales the
very, very good blonde, and the
very, very bad brunette, and the
man they both loved. So much I
remember from my mind and un-
der the sofa cushion library days.
"Thorns and Orange Blossoms"
runs true to form, and to the mean-
ingful, played by Estelle
Taylor, does try her best to steal
the heart of the good blonde,
played by Edith Roberts in a wig.
And my, oh, my, but doesn't Es-
telle just act as though cum-dass
were its own reward! Or else she
must have been awfully naive to
think that, after she had put the
poor man in jail by pretending he
had taken a shot at her, he would
then be a girl of his own over-
whom they had been quarrelling!

But that wasn't any more naive
than the fact that the had her
bet's confession that she had lied
on oath about the shooting brought
forth no punishment from the
court! And, by the way, what nice,
clean, commodious jails they al-
ways have in pictures! I think the
censors should look into this. They
don't look at all bad places to
stay in!

By the way, it is something of
a commentary on the change in
viewpoint that, whereas the old
Victorian parent sternly forbade
Bertha M. Clay as demoralizing,
the Clay story material is now be-
ing used because it's so whole-
some! I think our parents were
mistaken, I remember being dis-
tinctly disappointed in it!

Anyhow, didn't the bad brunette
of "Thorns and Orange Blossoms"
repent and go into a Spanish
dance at the end of the film story?
But also Estelle Roberts, as an
awful good Spanish dancer, in-
stead, that was one of the heav-
iest of her sins in this story, to
our way of thinking.

Oh, but what's the use! You'll
see some stunts out of "Thorns
and Orange Blossoms," as well as
renewing the days when you placed
Bertha M. Clay inside your geo-
graphy.

The players do as well as could
be expected. The bad brunette
does work that is far better than
the story as the pulled-and-hauled
here.

New Brightness for Her as Star

Irene Rich
Who, on the strength of an excellent performance in the picture,
"Brass," has recently been signed by Warner Brothers for a term.

PLAYDOM
"VANITY FAIR"

Pictorial Charm in Ballin Pro-
duction
By Edwin Schallers
This is the season for social
climbers in picturedom. There is,
for instance, the famous Becky
Sharp in "Vanity Fair" at Gra-
man's Metropolitan. Now, them
climbers, not to speak of a less
notorious and less interesting lady
in "The Rustle of Silk," at Gra-
man's Metropolitan. Now, them
climbers, not to speak of a less
notorious and less interesting lady
in "The Rustle of Silk," at Gra-
man's Metropolitan. Now, them
climbers, not to speak of a less
notorious and less interesting lady
in "The Rustle of Silk," at Gra-
man's Metropolitan.

Incidentally, this Hugo Ballin
picture is a good antidote for too
much Cinderella. It shows that
the girl with aspirations, and
on the look-out for a rich suitor
doesn't always get what she hopes
for. In fact, she is quite lucky if
she gets a little change from the
other man.

The time that Thackeray wrote
"Vanity Fair" must have been a
naughty time, indeed. Fair ladies
didn't hesitate to let their hus-
bands languish in jail for debt
while they vamped wealthy old
duffers for a new diamond breast
pin.

It's long ago since I read "Van-
ity Fair" and consequently my im-
pressions of the picture are not
greatly hindered by my re-
membrance of the novel. I judge
that the continuity follows the
original about as closely and con-
tinuously as the law of the studio
will allow. I think that there
were perhaps fifty characters in
the Thackeray version but their
names have been somewhat de-
pleted. It is lucky too that they
were, as there are still plenty of
faces to keep track of in the pic-
ture.

Mr. Ballin has well-defined
lines of artistry and consequently my
impressions of the picture are not
greatly hindered by my re-
membrance of the novel. I judge
that the continuity follows the
original about as closely and con-
tinuously as the law of the studio
will allow. I think that there
were perhaps fifty characters in
the Thackeray version but their
names have been somewhat de-
pleted. It is lucky too that they
were, as there are still plenty of
faces to keep track of in the pic-
ture.

Program Shows
Popular Taste
at Symphony

A request symphony orchestra
program is at best a compromise,
for no matter how the program is
arranged it is not to be supposed
that even a few persons voted for
the program exactly as it was
given. But it is interesting as a
gauge of popular taste and mus-
ical discrimination.

Tet although the program was
given according to the number of
votes cast for the various num-
bers, it was not the most interest-
ing program this season on the
popular concert, which is no re-
flection on anybody; on the con-
trary it merely shows a prepon-
derance of taste for Tchaikowsky
and Wagner.

Probably no one who voted, or
but few, actually wanted the
"Fathetique," and three rather
heavy Wagner numbers in suc-
cession. They did want the
"Fathetique," and they did want
Wagner, and it was probably in
the lighter numbers that the opin-
ion was so diverse as to make any
of them singly appear not suf-
ficiently popular for them to ap-
pear on the program. At any
rate, the program for any of the
numbers was not sufficient to
merit any repeats.

The Tchaikowsky Symphony
was played with consummate artistry
throughout.

THREE-REELER ONE
OF BUSTER'S BEST
Buster Keaton has made a big
advance. Not alone in technique
but in producing a three-reel com-
edy like "Day Dreams," which has
just started its second week at the
Symphony.

We knew Buster would have to
make bigger comedies. His pre-
vious efforts satisfied so much they
didn't satisfy—if it can be put
that way. "Day Dreams" is Bus-
ter's first complete comedy of the
kind of screen entertainment that never
wears out its welcome.

His other features on the cur-
rent bill include the two-reel ex-
clusive picture of the ex-Kaiser in
exile, the fourth story of the "Lea-
ther Pushers," and the latest news
events.

CHARTER FIGHT ENDS TUESDAY

Santa Ana to Vote on Charter
Both Factions Committed Intensely

Business Interests Managerial Role
LOCAL GOVERNMENT
SANTA ANA, April 15.—The charter fight in Santa Ana, which has been going on for several months, ended today with the adoption of a new city charter by the city council.

But the charter is not the end of the fight. The city council has adopted a new charter, but the city manager, who is in charge of the city's affairs, has refused to accept it. He has said that the charter is not in the best interests of the city and that he will continue to fight for a better one.

CHARTER COMMITTEE
The charter committee, which was formed to study the city's needs and to recommend a new charter, has been working for several months. It has held many public hearings and has received many suggestions from the citizens of Santa Ana.

Knights Templar of Long Beach Attend Conference
By a "Times" Staff Correspondent
LONG BEACH, April 15.—The Knights Templar of Long Beach, California, met today for a conference at the Hotel Long Beach. The conference was held to discuss the affairs of the order and to plan for the future.

Wins Second Prize
RIVERVIEW, April 15.—The Riverside High School won second prize in the annual spelling bee held at the Riverside High School today. The school's team consisted of several students who had been practicing for weeks.

People and Their Trouble

THE LAST WORD.
BY ALMA WHITAKER

Many of our people are in a state of confusion. They are not sure of what to do. They are not sure of what to say. They are not sure of what to think. They are not sure of what to feel. They are not sure of what to do, what to say, what to think, what to feel.

CHARTER COMMITTEE

RED STAR LINE
Celebrating this year 50 years of passenger service

BELGENLAND
New Queen of Red Star Fleet

THE Belgenland inaugurates a regular schedule of Red Star Line sailings every Wednesday from New York to Plymouth, Cherbourg and Antwerp. Among the typical innovations on the Belgenland is the a la carte dining service without extra charge. A famous Continental chef presides over the kitchen. Accommodations include such conveniences as hot and cold running water in each room, shower baths, beds instead of berths, automatic heating and ventilating systems—all the appointments of the most modern hotel. Large decks for games, swimming pool and completely equipped gymnasium. For the leisurely inclined traveler, the ease and comfort of the glass enclosed shelter deck and spacious public rooms.

The Belgenland's principal running mate will be the distinguished liner Lapland, favorite of many experienced travelers. With her veranda café, tempting Continental cuisine and delightful appointments in both staterooms and public rooms, the Lapland is one of the outstanding liners in the North Atlantic.

Added to these features is that perfection of service which has characterized the Red Star Line for more than half a century.

TIMES WANT ADS

Prize Winning Anecdote
Submitted by John P. Watson,
1144 N. Los Angeles St., Los Angeles.

Says he found nugget of gold in craw of a chicken

"I am the man who found a nugget of gold in the craw of a chicken out Tropic way and it came about through a Times want ad."

"I was on South Olive Street and saw a shabby looking fellow pick up a lady's purse. He was making off with it when I said, 'Hold on, friend; you found a purse, did you not?' 'Why, no,' he replied."

"Oh, yes you did," I said, "and I want to see it." Nothing doing," he said. So I told him I would hand him over to the next policeman we met."

"He hesitated for a while, but finally produced it from under his coat."

"Open it up," I ordered. He did so and there was disclosed to view several papers, some change, and a lady's name ring. An idea struck me so I said, 'I will give you \$5—your hand over the purse to me and I will advertise it in the Times want ad column.' He consented and took the \$5. That night I went to the Times office and inserted an ad offering to return the purse and contents to whoever could prove ownership."

"I got a telephone call next day. I answered it and a young and pretty woman convinced me that she was the owner of the purse. She gave me a job on a chicken ranch she owns and I fell in love with her."

"We are now on our honeymoon, but expect to be back on the ranch before long and happy and contented, raise lots of little chickens and perhaps find out where the gold nugget came from."

Unlike display advertising, classified advertising reaches the attention only of those who voluntarily seek it out. The multitudes which daily read TIMES want ads—active buyers who seek every imaginable kind of article—are what differentiates TIMES want ads from all others, making the service UNIQUE and INCOMPARABLE.
